Personal & Academic Projects

Stock Market Prediction (Final Year Project)
Aug 2019 – April 2020
https://barindebnath.pythonanywhere.com/
A web application that helps newcomers to invest into the stock market. It uses Sentiment Analysis to understand the current trend of a particular stock. This app provides stock data from all over the word, for users to select from. It shows the possible chances of stock to fall or rise and give recommendations as needed. It uses machine learning algorithms like NLP, Naive Bayes to understand public opinions. The web app also provides historical price charts for the particular stock.

- Python
- Bootstrap
- CSS
- JavaScript
- AlphaVantage
- Twitter Developer API
- Highcharts
